Progr. C. student with WAIVER+	BEST TO WORST	5000	18000	Potential grants and fellowships as in the boxes above					5000-23000

The ECT+ JPB recommends you to be conservative with your financial expectations.

- You should ensure that you could cope with the budget indicated in red for a period of two years because Mobility and Research Grants cannot be ensured. If you get them, it will make your life easier but you should be able to complete the programme without their support.
- Note that main travel costs (resulting from compulsory mobility pathways to partner universities) are not included and these should be added to your prospective self-funding needs.
- Only few students will be eligible (and more easily Programme Country students than Partner Country Students, due to permanent residence requisites of the calls)

(1) Estimates based on only 1 semester granted along the 2-year period; but they might be only 1-2 grants (1 semester each) per intake per year in the best of the cases.

(2) Similar grants may apply for other Partners; this is just exemplary. Look for updated information at each Partner's International office and website

(3) Main travel costs are not included.
